: - UK Omni - Jan 12 2010 --- Vision Critical --- 1/21/2010 tl

Results are based on two-sided tests with significance level 0.05. For each significant pair, the key of the category with the smaller column proportion appears under the category with the larger column proportion.

Tests are adjusted for all pairwise comparisons within a row of each innermost subtable using the Bonferroni correction.

Cell counts of some categories are not integers. They were rounded to the nearest integers before performing column proportions tests.

: - UK Omni - Jan 12 2010 --- Vision Critical --- 1/21/2010 tl

Results are based on two-sided tests with significance level 0.05. For each significant pair, the key of the category with the smaller column proportion appears under the category with the larger column proportion.

Tests are adjusted for all pairwise comparisons within a row of each innermost subtable using the Bonferroni correction.

Cell counts of some categories are not integers. They were rounded to the nearest integers before performing column proportions tests.

Table 54

BB4. Here is a picture of a woman wearing a hijab. Would you agree or disagree with banning the hijab in the UK in each of the following scenarios?

			Total	Region					Gender		Age			Social Grade	
			(A)	London (A)	Rest of South (B)	Midlands and Wales (C)	North (D)	Scotland (E)	Male (A)	Female (B)	18-34 (A)	35-54 (B)	55+ (C)	ABC1 (A)	C2DE (B)
